WHO ARE WE?

COMPANY PHILOSOPHY & PROGRAMMES

We believe that the rich learning experiences our programs offer can affect powerful and positive transformation individuals, in their communities, institutions and countries. We work with our partners globally to design and implement programs in which participants reach across – and live across – boundaries and borders. And we do this in an atmosphere of mutual respect, organized collaboration, and fun.

PROGRAMMING

We conduct 50-70 short-term programs each year for groups that range in size from 1 to 40 participants, and participants who are 16 to 60 years age group. Programs last anytime from one week to four weeks, after which time participants return to their communities, provinces and home countries. We tailor each program's content to its respective participant profiles, its thematic concentration, and its country or countries.

PROGRAM COMPONENTS AND METHODOLOGY

GNBI recognizes that the adult participants who take part in our project's are experts in their fields, and that youth entrepreneurs also bring a great deal of knowledge, innovation and creativity. We see our role as exposing them not only to new knowledge but also to widely different ideas, situations, emerging markets, developed markets and world-renowned entrepreneurs, leaders and advocates of economic empowerment. GNBI sessions stimulate thought and discussion, so that participants may build on their own knowledge and understanding. Conversely, we call on our foreign participants to help inform the South Africans they encounter about their cultures and expertise.

GIVING BACK TO THE COMMUNITY

Giving back to the historically marginalised communities in the developing countries and South Africa specifically, our work with a wide range of delegates and partners has led to profound intercultural learning experiences.

Course Overview

Public Administration, Strategic Planning and Decentralization Program Overview

GNBI helps public administrators and financial officers develop skills to manage the transition from centralized, controlled systems to a decentralized market economy characterized by transparency, the free and rapid flow of capital and information. GNBI projects explore the three most successful components of the fight against government corruption: prevention, investigation/enforcement, and education, in the context of a specific country. Participants are prepared and encouraged to raise public intolerance of corruption, to promote anti-corruption reforms at the local level, and to mobilize targeted, effective citizen campaigns to combat corruption.
